

Corporate Presentation

CSE: KUYA | OTCQB: KUYAF | FRA: 6MR1

HIGH GRADE | GROWING | SILVER PRODUCTION | AMERICAS

FEBRUARY 2022

IMPORTANT DISCLOSURES - PLEASE READ CAREFULLY

This presentation is being provided for information purposes only and does not constitute or form part of, and should not be construed as, an offer or invitation to sell or any solicitation of any offer to purchase or subscribe for any securities of Kuya Silver Corp. (the "**Company**") in Canada, the United States or any other jurisdiction. Trading in the securities of the Company should be considered highly speculative. This presentation is not, and in no circumstances is it to be construed as, a prospectus, offering memorandum, an advertisement, or a public offering of securities. No securities regulatory authority or similar authority has reviewed or in any way passed upon the document or the merits of any securities of the Company and any representation to the contrary is an offence. The information contained in this presentation is a summary description of the Company prepared by the Company and there is no representation or warranty by the Company or any other party as to the accuracy or completeness of the information set forth herein and no recipient will be able to rely on any representations or warranties contained in this presentations. Except as otherwise stated, information included in this presentation is given as of the date hereof. The delivery of this presentation shall not imply that the information herein is correct as of any date after the date hereof. Readers should not construe anything in this presentation as investment, legal or tax advice. Each recipient should consult its own investment, legal, tax and other advisers regarding the financial, legal, tax, and other aspects of the Company, including whether it is legally permitted to purchase any securities from the Company under applicable laws. All dollar amounts referenced herein, unless otherwise indicated, are expressed in U.S. dollars.

The independent Qualified Person for the Mineral Resource Estimate, as defined by NI 43-101, is Mr. Simon Mortimer (FAIG #7795) of Atticus Geoscience Peru. The effective date of the Mineral Resource Estimate is December 10, 2021. Mineral Resources are not Mineral Reserves and have not demonstrated economic viability. The quantity and grade of reported Inferred and Indicated Resources in this Mineral Resource Estimate are uncertain in nature and there has been insufficient exploration to define these Inferred and Indicated Resources as Measured, however it is reasonably expected that the majority of Inferred and Indicated Mineral Resources could be upgraded to Measured Mineral Resources with continued exploration. A cut-off grade of 100 g/t silver equivalent ("AgEq") was applied in the reporting of the resource model, which used a minimum block size of 0.60 metres to reflect the minimum mining width applied at this deposit. The cut-off was determined as an approximate break-even cost calculated from known historical mining and recovery costs. Geological and block models for the Mineral Resource Estimate used data from a total of 33 surface drill holes, completed by the Company, and historical underground sampling collected by previous operators. The drill hole database was validated prior to resource estimation and QA/QC checks were made using industry-standard control charts for blanks, core duplicates and commercial certified reference material inserted into assay batches by Kuya. Mineral resource estimates in Table 1, Table 2, and Table 3 have been rounded to two significant figures. The Mineral Resource Estimate was calculated on the basis of 18 modelled veins which were grouped into three vein systems based on the current understanding of the major structures controlling silver mineralization. The Mineral Resource Estimate statement excludes material that has been mined out and the material in the upper levels of the mine that may not be extracted based on expected requirements for mine safety. Silver equivalent (AgEq) was calculated using the following commodity prices: Au (USD/oz) \$1,849.78, Ag (USD/oz) \$25.44, Pb (USD/t) \$1,981.79, Zn (USD/t) \$2,658.62, and Cu (USD/t) \$7,971. The recovery factors (%) used in the calculation of the Mineral Resource Estimate were: Au at 0.4439; Ag at 0.9324; Pb at 0.9449; Zn at 0.9265; Cu at 0.8829. The Mineral Resource Estimate was prepared following the CIM Estimation of Mineral Resources & Mineral Reserves Best Practice Guidelines (November 29, 2019). The development of the Mineral Resources that are the subject of the Mineral Resource Estimate may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, and other relevant risks. For additional information on risks and uncertainties that could affect the Company and the development of its mineral projects, please refer to the "Risk Factors" section in the Company's Amended and Restated Annual Information Form dated October 15, 2021 for the year ended December 31, 2020 ("AIF"), which is available on SEDAR at www.sedar.com. The risk factors identified in the AIF are not intended to represent a complete list of factors that could affect the Company or the development of its mineral projects

Dr. Scott Jobin-Bevans (P.Geo., APGO #1083), Principal Author, visited the Bethania Silver Project on 15 June 2019. The purpose of the site visit was to observe mine and general Property conditions, surficial geology, underground geology and mining procedures, proposed sites for the processing plant and related equipment, and sites for any exploration work including historical surface trenching and excavation (past mining), inclusive of associated quality assurance/quality control. During the 2019 site visit by Dr. Jobin-Bevans, a total of five rock samples were collected from five of the main veins, either from surface exposures or from underground workings. Mr. Simon Mortimer (MAusIMM, FAIG), consulting geologist (Atticus Consulting S.A.C.) visited the Bethania Silver Project from the 24 to 27 May 2021. The purpose of the site visit was to observe the processes and protocols in place for the collection of geological data – the geological logging, the capture of data in digital format, the selection, taking, and registering of samples, the associated quality assurance/quality control and the transport and storage of the samples; to visit the drill pads and observe the procedures in place for the extraction of the core and delivery to the logging shed; and to review the drill core, the surface geology and map some of the principal structures, contacts and outcropping veins. The QPs have reviewed the historical data and information regarding past exploration, development work, and historical mining on the Property as provided by Kuya. Kuya was entirely cooperative in supplying the QPs with all the information and data requested and there were no limitations or failures to conduct the verification and so it was concluded that information in the database is suitable for mineral resource estimation. Past mine production data as reported to the Ministry of Energy and Mines during the period 2013-2016 is evidence that the mine was worked to accepted standards, and although it should be recognised that geological data relating this last period of mine working lacks QA/QC support, mine mapping and sampling is noted to be of a high standard, and the QPs are confident that this data can be used for guidance in the planning of future work programs and for the purposes of geological modelling and inclusion in the current MRE. The sampling of, and assay data from, the drill core was monitored through the implementation of a quality assurance/quality control ("QA/QC") program designed to follow industry best practice. See the technical report titled, "Independent Technical Report on the Bethania Silver Project, Department of Huancavelica, Province of Huancavelica, District of Acobambilla, Peru", dated 29 September 2021, for additional information on the QA/QC program and results.

WELL-RUN SILVER MINES COMMAND A MARKET PREMIUM

Bethania is a great first asset

Recent Past

- Producing silver mine until 2016 – now on care and maintenance.
- **Extensive database** of information with clear geologic model in place.
- Earn-in acquisition signed with Kuya late 2017
- Mine debt retirement completed in 2019
- Technical program for mine expansion initiated
- Completed initial 43-101 technical report

RTO - Present (2020-2022)

- ✓ RTO Q3 2020 (**June-Sept, '20**)
- ✓ Raised C\$21.5M (**two tranches, '20-21**)
- ✓ Received EIA approval (**Aug '20**)
- ✓ Closed acquisition of mine (**Dec, '20**)
- ✓ Engaged Mining Plus for PEA (**Dec, '20**)
- ✓ Acquire District-Scale Land Package (**Nov, '21**)
- ✓ Drill/update historical estimate (**Jan, '22**)
- ✓ PEA – Mine Expansion
 - Finance Expansion
- ✓ Build management team (**In Progress**)

Future Vision (2022+)

- Commission/Production Bethania
- Low cost silver production
- Aggressive regional exploration near Bethania
- Next growth stage: Expanding Bethania, Develop Kerr Project, Ontario (Canada)
- Longer-term growth from regional exploration in Peru and Silver Kings project, Canada
- Re-rating potential based on comparable public **silver mining** companies

SHARE STRUCTURE

Shares Outstanding	45,279,981
Market Cap. (Jan. 25 th)	C\$50.74M
Warrants (C\$2.60 strike)	2,421,325
Options (C\$0.90 - \$4.15 strike)	1,585,000
Fully Diluted	49,286,306

Significant Shareholders

Management	21.6%
Kuya Advisory Team (see slide 23)	11.7%
Eric Sprott	4.3%

Other Large Shareholders

Sprott Asset Management
Crescat Capital
First Cobalt Corp.
Earth Resource Investment Group

SILVER COMPANIES - VERY SMALL SECTOR

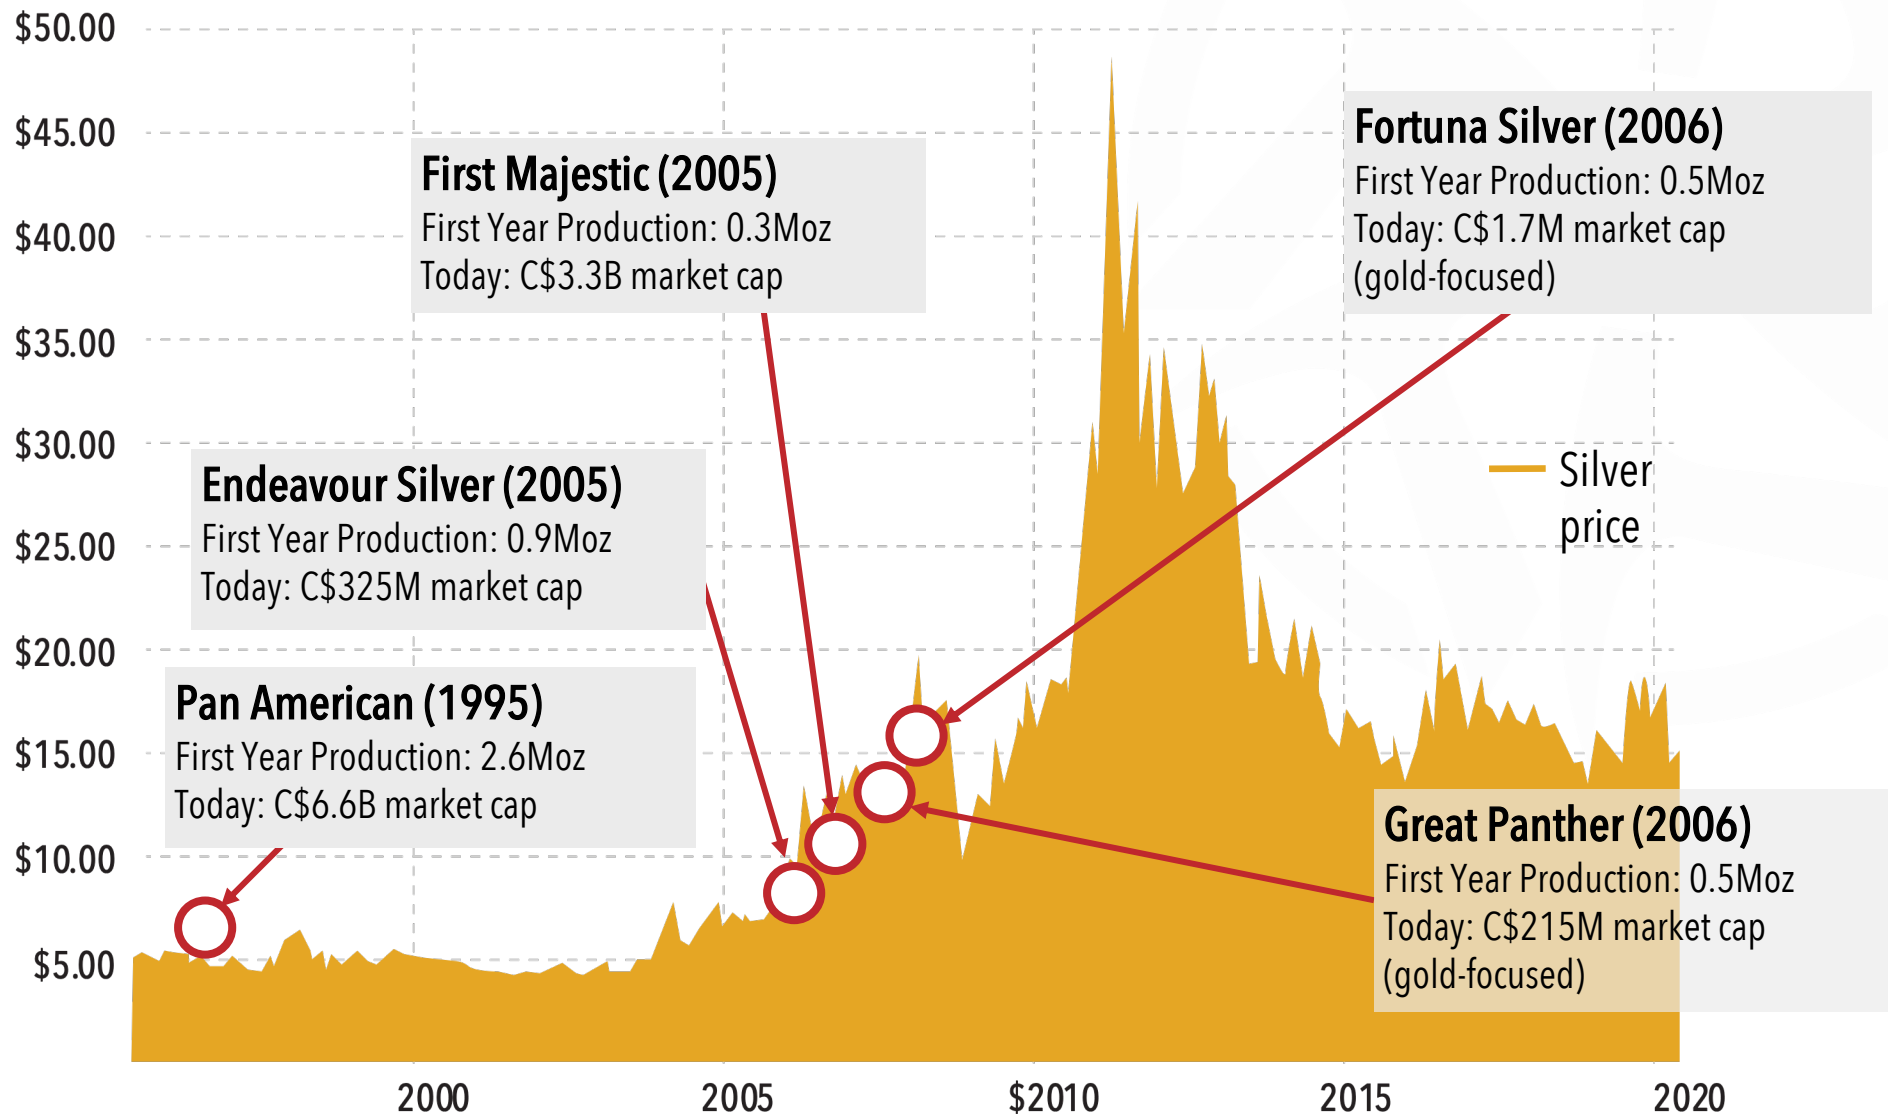

Silver Equities Universe

- Lack of good investment choices drives premium valuations
- The investable silver universe is very small
- Significant value increase for production
- Production and/or significant exploration projects typically valued at C\$100M - C\$1 billion+

WHAT DO THESE SUCCESSFUL SILVER COMPANIES HAVE IN COMMON?

Start **small**
and grow
through
production
and
acquisition

FOLLOWING A SUCCESSFUL PROVEN STRATEGY

The **Bethania Mine** will Launch the Market's Next Silver Mining Company

1

Identify a high-grade silver mine (e.g. Peru or Mexico – the two most prolific silver mining countries in the world) – benefitting from strong mining culture, and infrastructure

START with a great silver mining asset!

2

Acquire small-scale mines from local owners – with institutional market access to capital we are able to drill (increase resources/reserves) and expand (increase production/reduce costs)

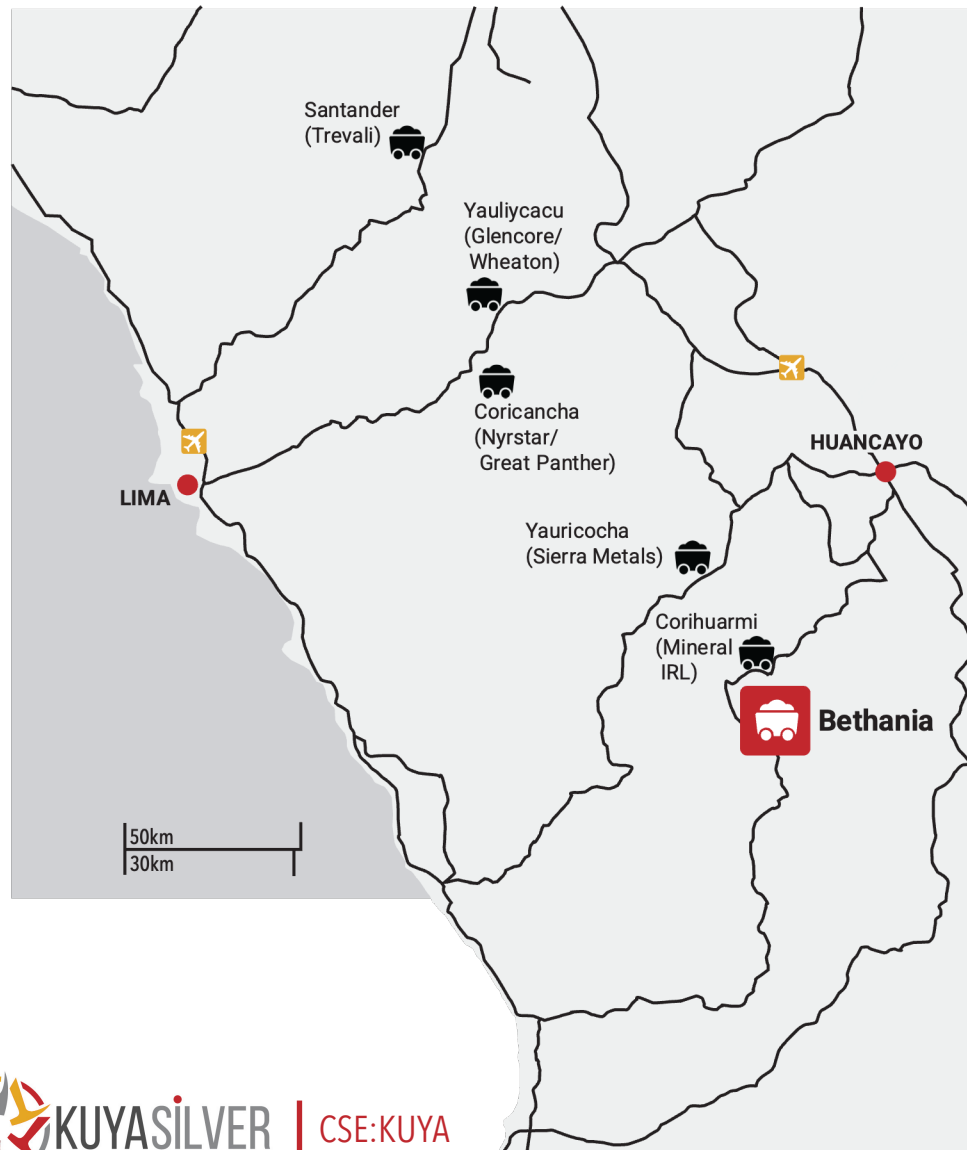

3

Benefit from by-product sales: base metals and gold (65%+ revenue from silver in our case)

4

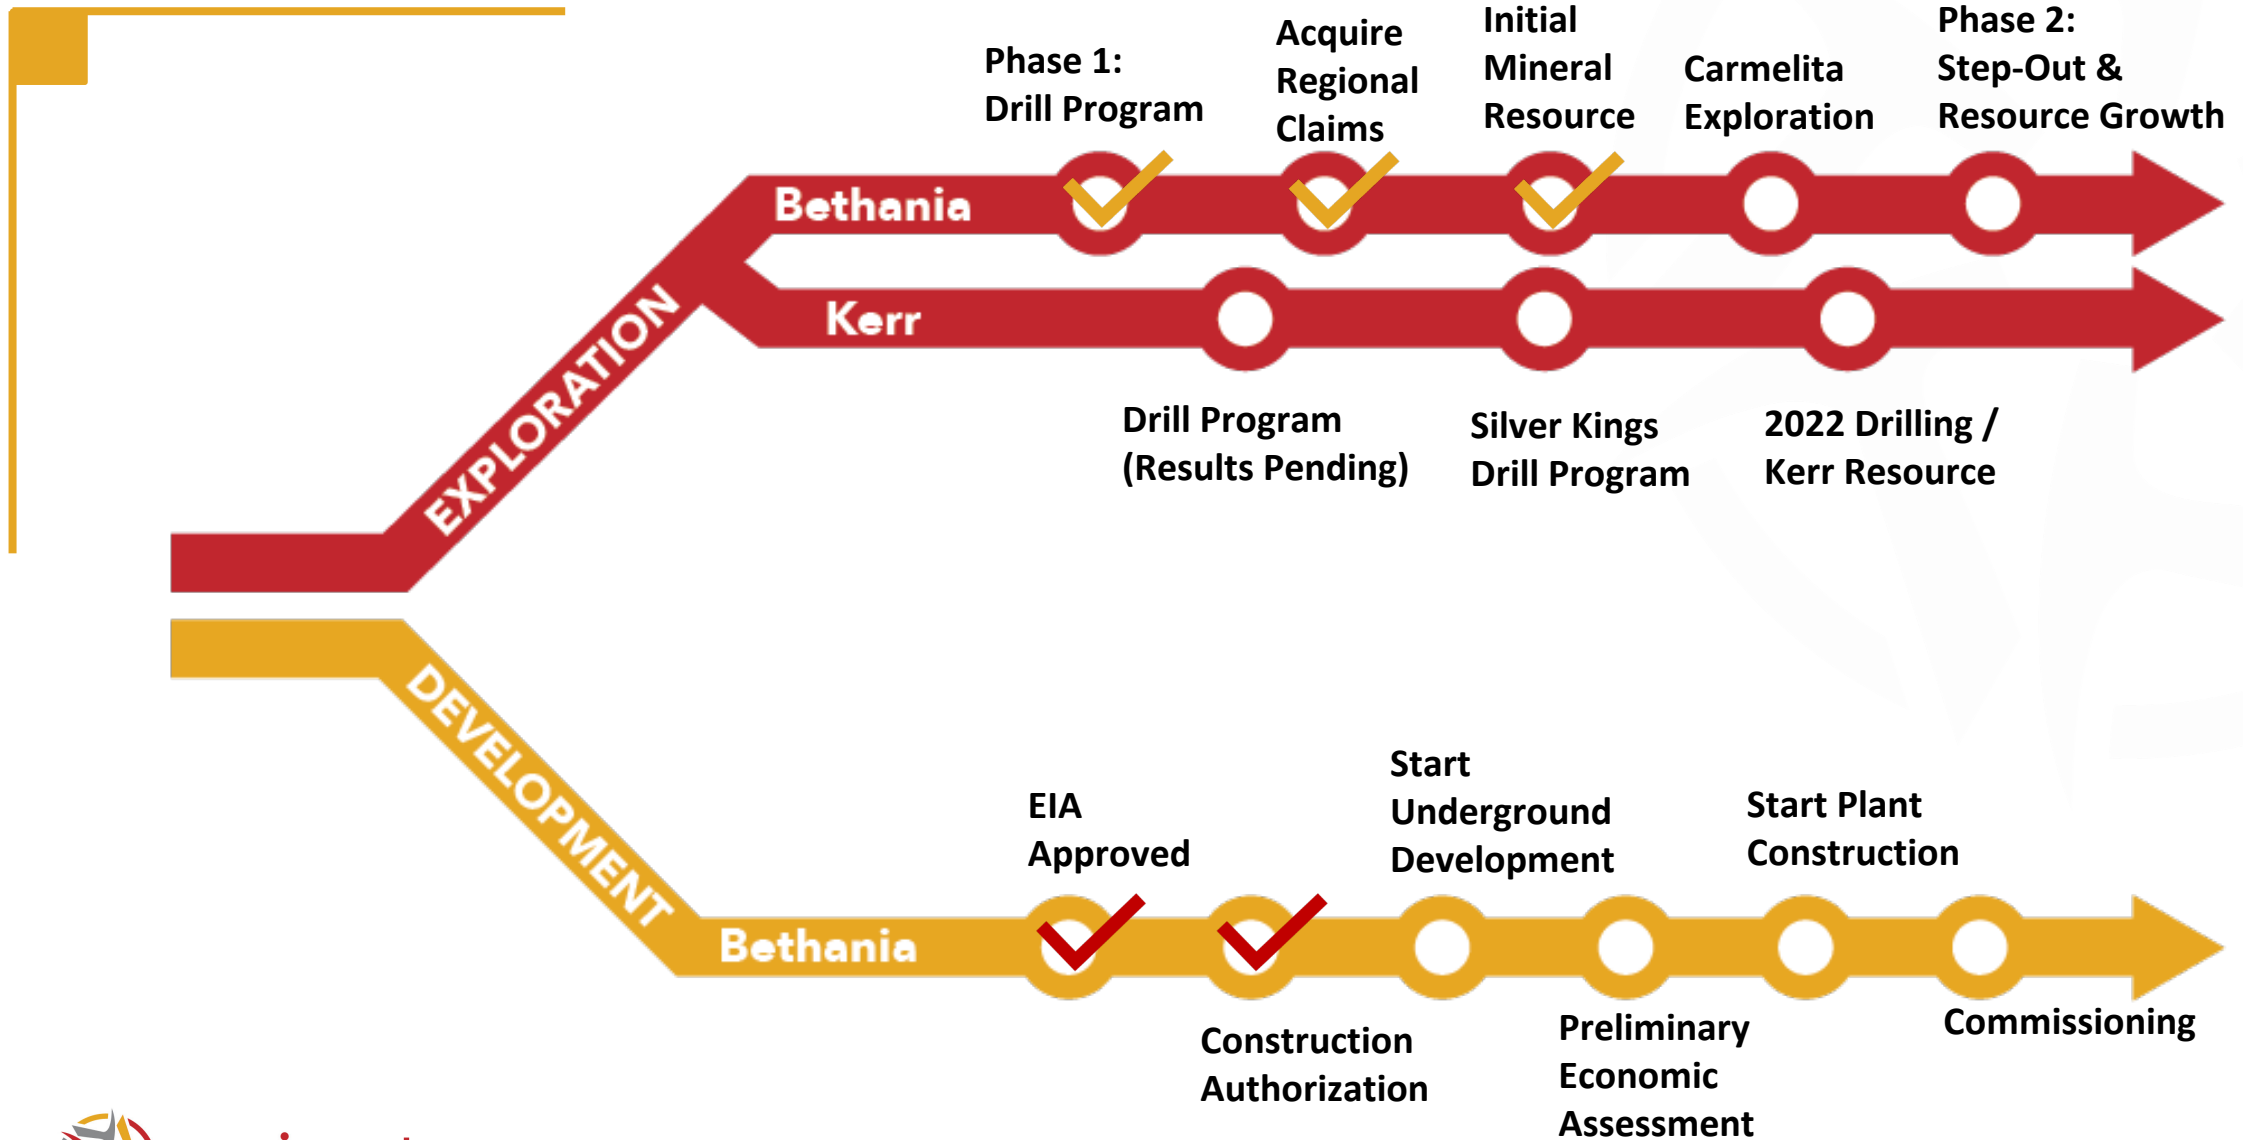

Lower risk: predictable geology, low capital intensity, well-established mining methods, off-the-shelf processing methods, established workforce, and permits in place

GREAT ACCESS AND HISTORY

- Located in major silver-lead-zinc mining district in Central Peru
- Access mine by road from Huancayo (major city)
- Daily flights from Lima to Jauja (near Huancayo)
- Mine located near mining village of Bethania
- The Bethania Mine formally opened in 1977 after discovery of two veins (Española and 12 de Mayo) and has been operating at a small scale on and off for 40 years
- Peruvian family acquired Bethania mine, restarted ore production in 2009 and began toll processing in 2013
- Achieved production of 28,788 tonnes in 2014, producing 425,000 oz silver equivalent (only lead and zinc by-products)

DUAL TRACK VALUE CREATION

BETHANIA EXPANSION – OPTIMIZING FUTURE PRODUCTION

Potential Cost Savings

TREATMENT/ REFINING

- Onsite 350 tpd facility
- Better TC/RC market
- addition of copper/gold circuit

PROCESSING

- no toll milling fees
- greater recoveries

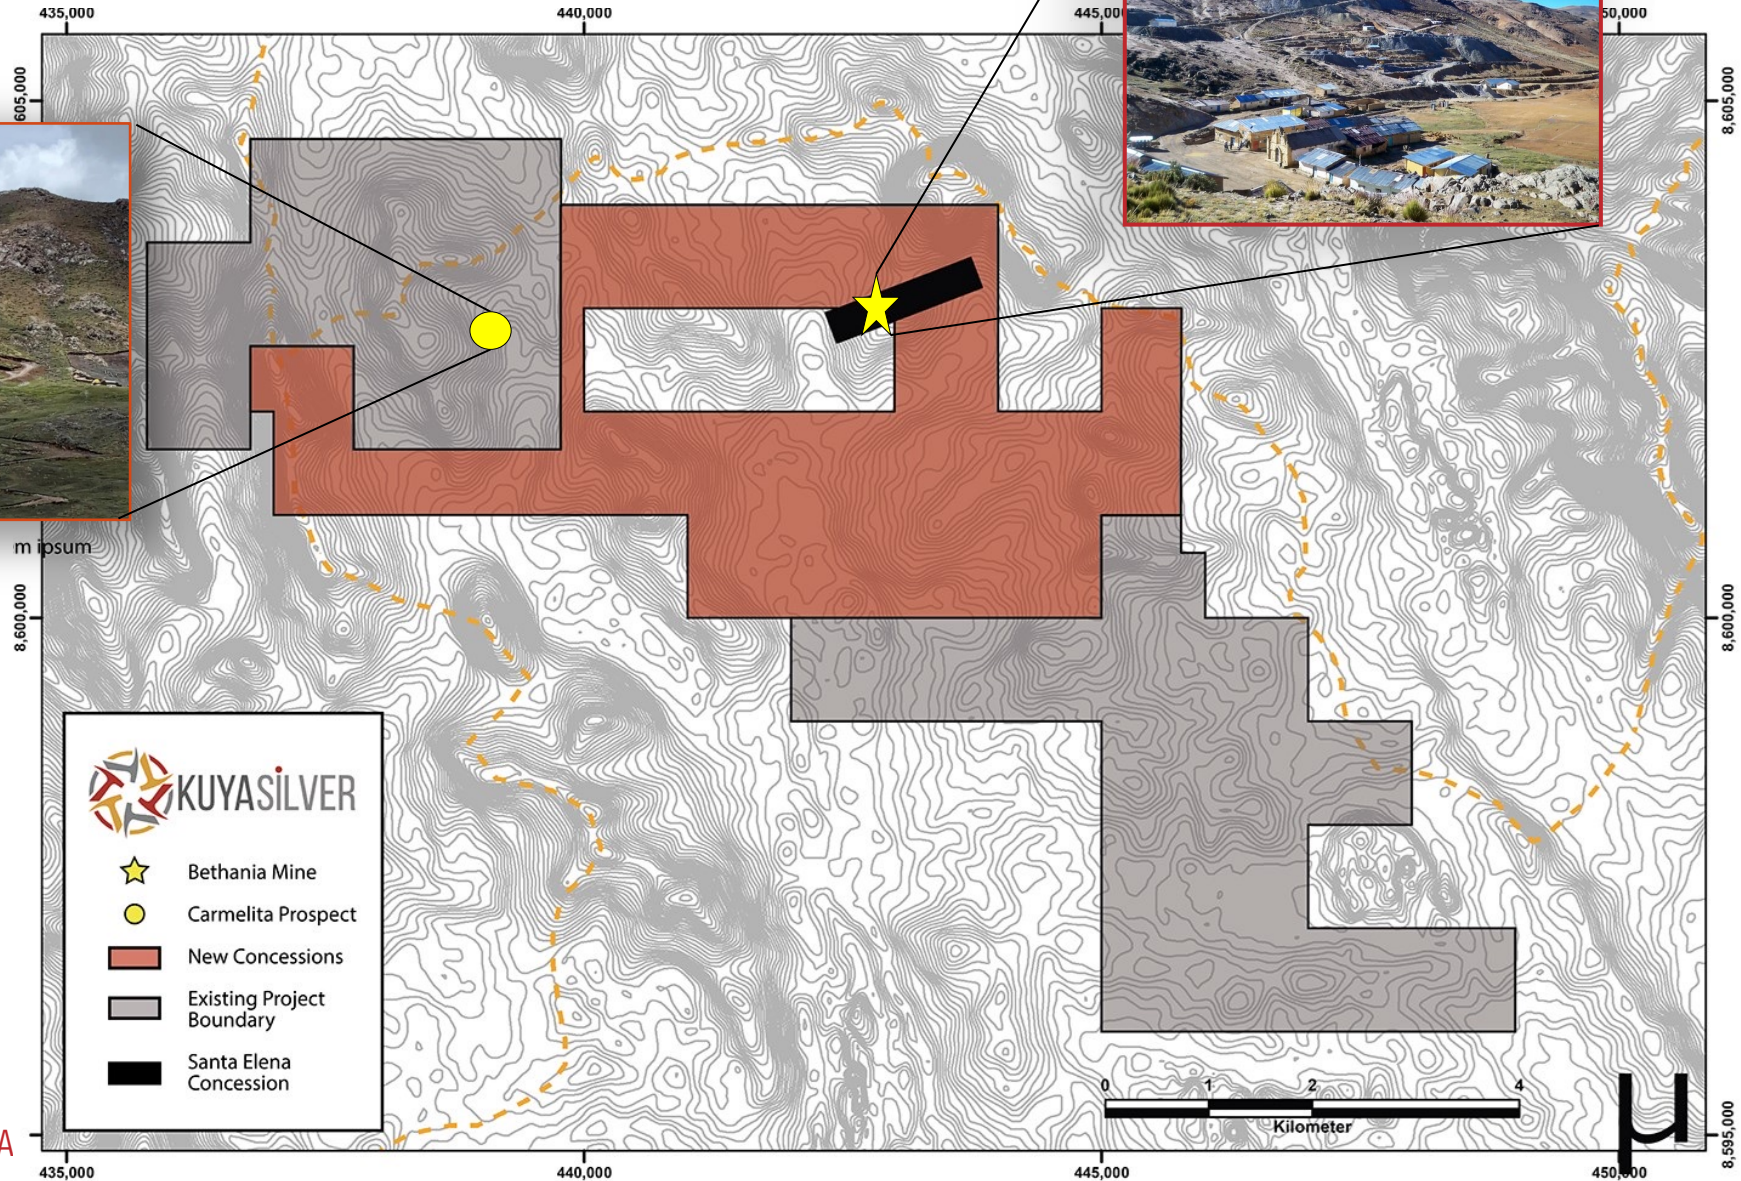

TRANSPORT

- eliminate long haul ore trucking

Onsite Production

- High grades, higher recoveries
- No royalties or streams
- Mining near surface (lower haulage, mining costs vs. deep mines)
- Low non-discretionary sustaining capital, can increase with higher profits
- Lower G&A (no legacy costs)

BETHANIA – DISCTRICT-SCALE POTENTIAL

**5300 Hectare
Land Package**

INITIAL MINERAL RESOURCE

Bethania **Near Surface Maiden Resource**

- Resource Drilling Focused On Shallow Mineralization Proximal to Bethania Mine Workings
- **63%** of Indicated Silver Equivalent Resource Estimate **Located Above** Historical Production Adit (4670 Level)
- The resource estimate consisted of data collected from the 2021 (phase 1) 5,000-metre diamond drilling program as well as previously collected underground rock chip samples.
- Average diamond drill hole length in the 2021 drilling program was ~140 metres.

Category	Tonnage	GRADE						CONTAINED METAL	
		Ag	Pb	Zn	Au	Cu	AgEq	Ag	AgEq
		(g/t)	(%)	(%)	(g/t)	(%)	(g/t)	(oz)	(oz)
Indicated	404,000	332	2.63	1.95	0.26	0.16	451	4,317,540	5,858,521
Inferred	700,000	249	2.51	1.58	0.24	0.12	356	5,600,256	8,006,431

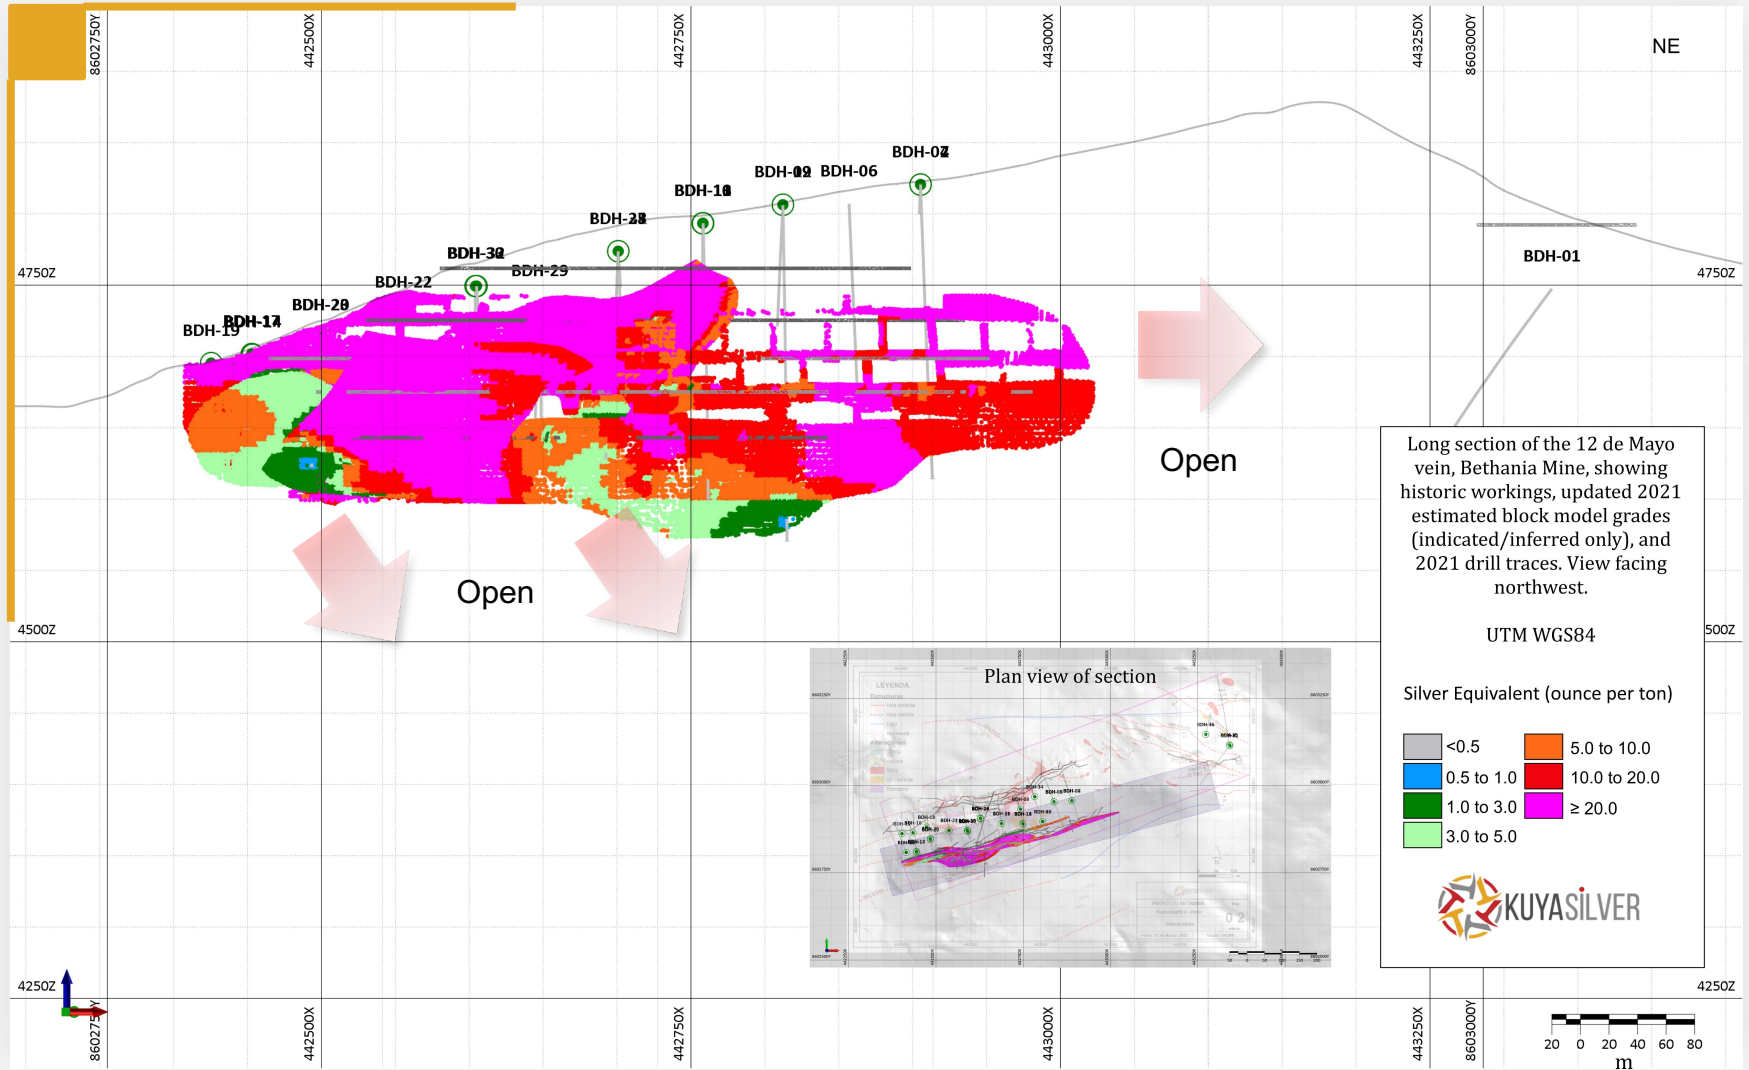

INITIAL MINERAL RESOURCE – BLOCK MODEL

Bethania **Significant Growth Potential**

1500m+ of prospective targets within 20 sub parallel mineralized veins

INITIAL MINERAL RESOURCE: 12 DE MAYO VEIN

Resource model extends to a maximum depth from surface of:

- **230m** in the 12 de Mayo vein (shown here)
- **200m** in the Española vein
- **180m** in the Victoria vein

All 3 vein systems remain open at strike and along depth

The resource estimate is solely focused on the main Bethania Mine area

LOW-RISK EXPLORATION

LOW-RISK EXPLORATION – GROWTH POTENTIAL

Bethania Mine Target Sections

ONGOING SURFACE EXPLORATION

Carmen Vein Discovery

- The Carmen Vein, a new discovery with up to 6.26 g/t gold reported from a new structure sampled over 300 m to date.

- *The gold-bearing mineralization differs from the traditionally-mined silver and base metal veins at Bethania.*
- Anomalous gold values can be traced for approximately 800 m along strike to the northeast.

GROWTH POTENTIAL - CARMELITA

Carmelita Property Bethania District

800 Hectare property strategically located
~3km from the Bethania Mine.

- Potential strike extension to high - grade silver-polymetallic vein system at Bethania
- Kuya geologists observed 5 veins outcropping on surface and took several samples (see image) of near - surface vein system.
 - System can be traced over 1 km in strike length
 - A potential satellite deposit

SOCIAL RESPONSIBILITY

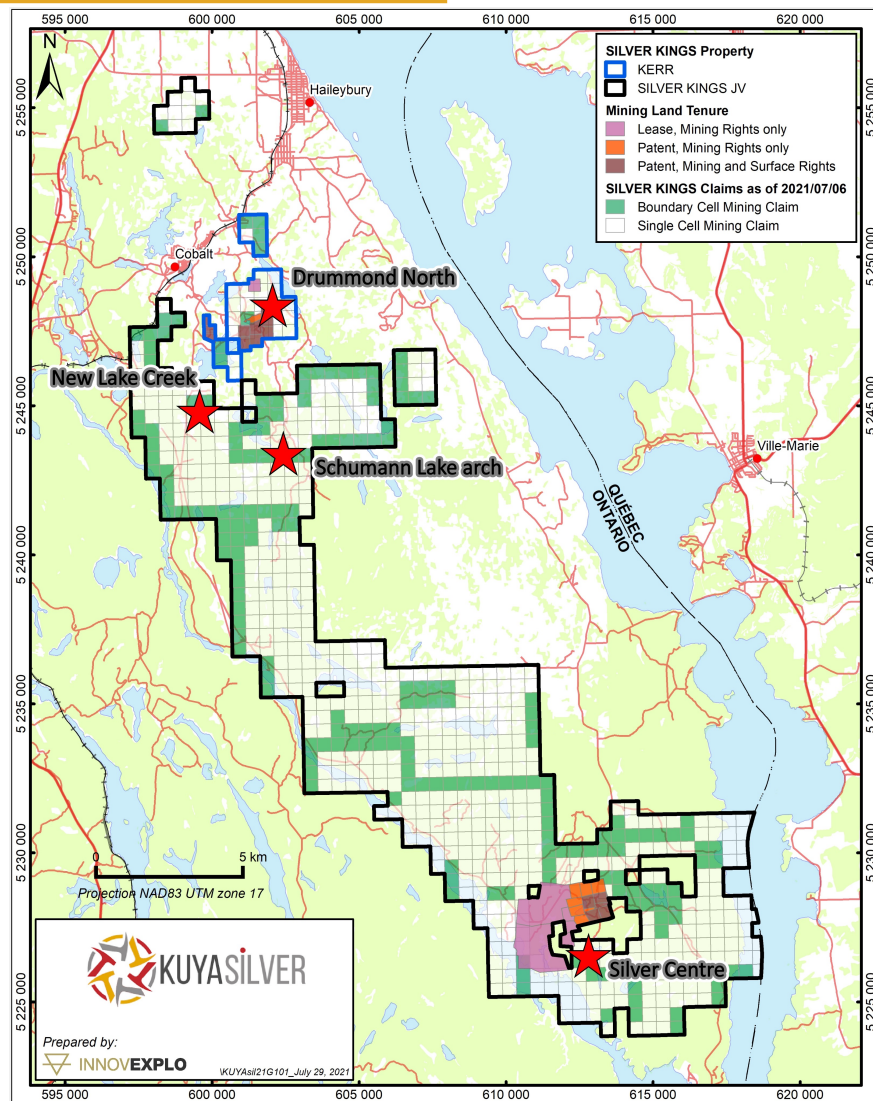

Kuya Silver is actively engaged in building on a strong legacy of working cooperatively with the local Poroche community to develop a mutually beneficial, safe and sustainable mining business in the region

The Company is committed to:

1. Providing a safe and sustainable work environment by implementing **new COVID-19 protocols**
2. Providing jobs to people from local communities
3. Meeting all environmental and governmental regulations
4. Operating under the highest ethical standards

INTRODUCING THE SILVER KINGS PROPERTY

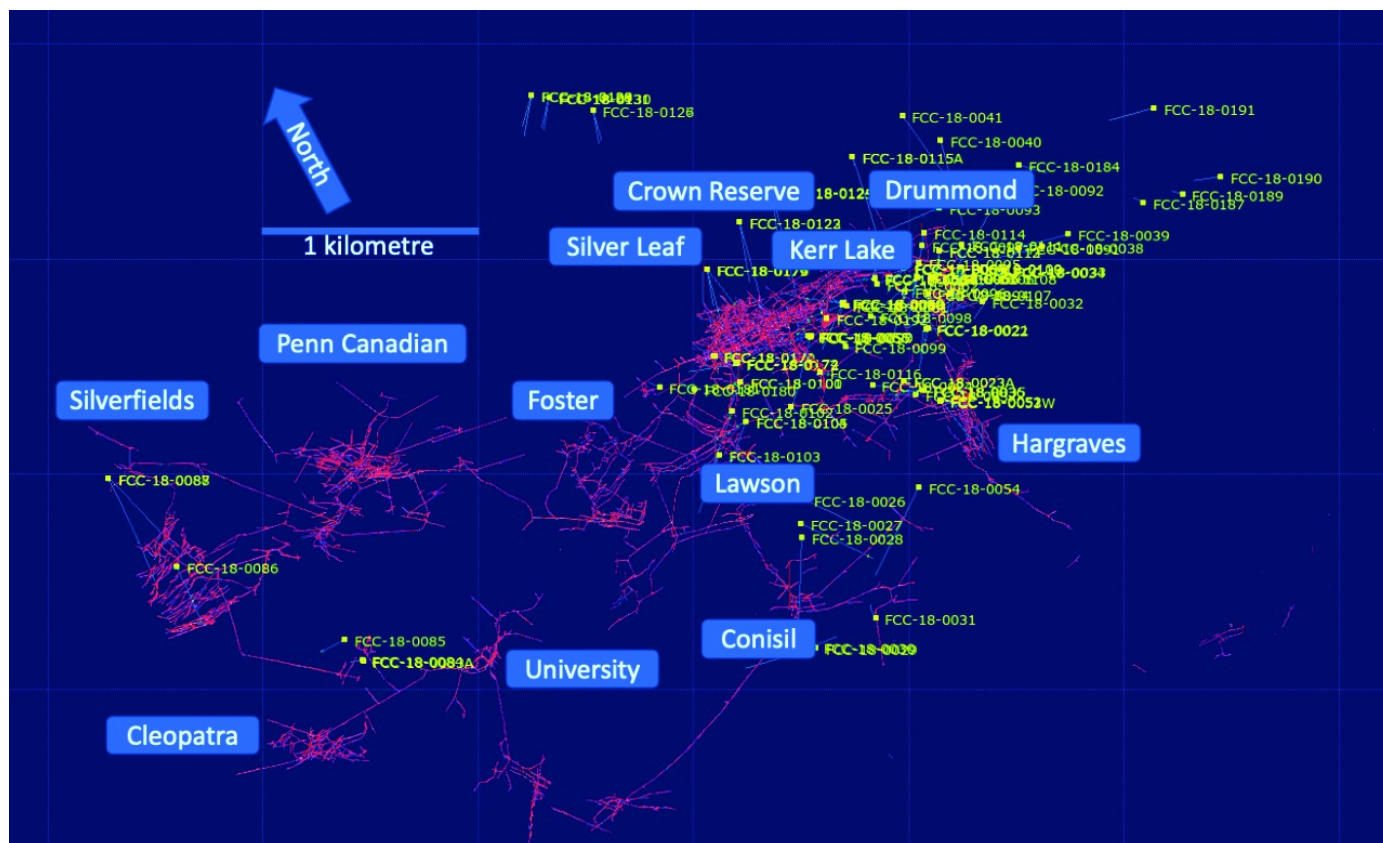

In March 2021, Kuya completed a transaction with First Cobalt Corp. to acquire 100% of the Kerr Project and an option to enter a joint venture to earn up to 70% of its remaining Cobalt area claims. The combined property area is now known as the Silver Kings Project.

Silver Kings Project

- The 10,000-hectare land package in NE Ontario is located within the historic Cobalt, Ontario silver mining district
- Previous operator identified several bonanza-style silver intercepts while exploring for cobalt at Kerr.
2,500m drilling program completed at Kerr (results pending)
- Project offers both near-term production potential at Kerr and district-scale opportunity at the underexplored Silver Kings JV.
- Kuya exercised the Silver Kings joint venture to earn up to 70% in September, 2021
2,000m+ drilling program at Silver Kings JV commenced in Nov, 2021

THE KERR PROPERTY AT SILVER KINGS

A World - Class Silver District

The Kerr Property at Silver Kings

Property Includes eight historic silver mines (Crown Reserve, Silver Leaf, Kerr Lake, Drummond, Hargrave, Silverfields and others.) on a contiguous 900-hectare area.

- Mines produced over 50 million ounces of silver between 1905 to 1950.
- The deepest shaft was less than 200 metres deep.
- System remains untested at depth

Intercepts from 2017 – 2018 First Cobalt drill campaign include:
FCC-18-0058: From 29.4 m, **intersected 3.57 m of 821 g/t Ag**
FCC-18-0093: From 172.1 m, **intersected 2.2 m of 515* g/t Ag**
FC-18-0094: From 20.0 m, **intersected 2.0 m of 450* g/t Ag**
FCC-18-0174: From 66.0 m, **intersected 2.5 m of 1441 g/t Ag**

*Individual silver assays capped at 1500 g/t included in reported intersection

MANAGEMENT & DIRECTORS

David Stein, MSc (Geo), CFA – President and CEO, Director

Mr. Stein founded Kuya Silver in 2017 to acquire the Bethania Silver Mine and develop the next silver mining company. Mr. Stein has spent most of his 20-year career in mining investments, first as a sell-side analyst and more recently as an investment manager.

Christian Aramayo, MSc (Eng), CEng – Chief Operating Officer

Mr. Aramayo is a UK-educated Peruvian engineer, previously worked on global projects for Kinross before starting his own mining consultancy. He founded SIGC Consultants in Lima, and Kuya has access to Mr. Aramayo and his team for engineering and planning as well as access to a deep network in South America.

Annie Sismanian – Chief Financial Officer

Ms. Sismanian is a chartered professional accountant (CPA, CA) with over 18 years of broad progressive experience in finance, strategy and corporate development. Prior to joining Kuya, she was vice-president of corporate finance and investor relations at Guyana Gold and has held senior financial roles at Hydro One, Kinross, Barrick, Fairmont and PWC.

Tyson King – VP Corporate Development

Mr. King has over 10 years experience in the management of publicly trading and privately held companies within the commodities and natural resources sector. He has been actively engaged in overseeing the day-to-day operations of several companies where he's held various senior officer positions throughout his career. Mr. King holds a BA in Economics from the University of Calgary.

Maura Lendon – Interim Chair & Director

Ms. Lendon, is a seasoned, internationally-experienced general counsel with over 20 years' experience in the mining and telecom industries gained after initially practicing with top Bay Street law firms. Ms. Lendon is the founder and Chief General Counsel of Scalable General Counsel, providing general counsel services to growing companies since 2019, and is currently a director of Eastmain Resources Inc. Previously, she was Chief General Counsel and Corporate Secretary of Primero Mining from 2012 to 2018.

Javier Del Rio - Director

Mr. Del Rio is a Peruvian mining executive with over 30 years of experience in the mining industry in both corporate and business unit roles and in open-pit, underground and expansion initiatives. Currently, as VP South America and USA for Hudbay Minerals Inc., he is responsible for the strategic and operational performance of the business units located in Peru, Arizona and Nevada, which also includes executive oversight of human and capital resources, environmental management, health and safety performance and community relations.

Andres Recalde – Director

Mr. Recalde is the Director of Mining for Common Good. His expertise is with social performance and building stakeholder confidence for the extractive industries. Mr. Recalde is Peruvian/Canadian and has worked extensively all over Latin America as a consultant, advisor and corporate director to mining companies such as Barrick Gold, Pan American Silver and Torex Gold.

Dale Peniuk – Director

Mr. Peniuk is a Chartered Professional Accountant (CPA, CA) and corporate director. Mr. Peniuk has a B.Comm from the University of British Columbia (1982) and received his Chartered Accountant designation from the Institute of Chartered Accountants of British Columbia. Mr. Peniuk also serves as a director and Audit Committee Chair of Lundin Mining Corporation, Capstone Mining Corp. and Argonaut Gold Inc

ADVISORY TEAM

Dr. Quinton Hennigh – Geologic Advisor

Dr. Hennigh is an economic geologist with more than 25 years of exploration experience with major gold mining firms, including Homestake Mining, Newcrest Mining and Newmont Mining. Currently, Dr. Hennigh is President and Chairman of Novo Resources Corp and serves as a director for Irving Resources Inc., TriStar Gold Inc., Precipitate Gold Corp and NV Gold Corp.

Erika Soria – Logistics/Business Development

Ms. Soria manages the commercial and administrative affairs of the Bethania mine and is the liaison with the local community. She is also well-connected in the Peruvian mining community and sources new opportunities for Kuya.

Hector Aramayo – Strategic Advisor

Mr. Aramayo, based in Lima, Peru, is an experienced civil engineer, consultant and project manager with experience in retail and industrial construction in Latin America. He is the Founder of SICG SAC, a construction contractor and management company that over the past 20+ years has built blue chip client base in Latin America.
